- Project Manager for RMP Common Configuration General Purpose Processor (GPP3) and Multi-Function Information Distribution System – Joint Tactical Radio System (MIDS-JTRS)
- Establish and communicate project objectives to all stakeholders
- Oversee development, monitoring, and control of project plans, master project schedules, EAC budget, and product deliverables
- Manage across functions to deliver quality product/service, within budget, on schedule.

Fighter and DLA Supply Chain Execution (April 2018 – April 2019)

- Collaborate cross-functionally throughout supply chain to mitigate delinquency risks
- Leverage knowledge of supply chain and processes to support order fulfillment and on-time delivery
- Perform analysis and provide data in response to inquiries for Integration and Program Management
- Identify and resolve customer supply chain management issues and discrepancies

International Integrator (September 2014 – April 2018)

- Integrated requirements to mitigate risk and resolve issues within the repair process.
- Collaborated across functions to ensure on-time delivery of repaired assets to international customers.
- Project Lead for creation of an online Depot Status Report tool automating reporting and providing real-time access to repair status for internal and external customers.
- Export focal for all International Country Sets; worked alongside DCMA to ensure accurate records, transportation plans, licenses, and certificates of authorization were processed for repair imports/exports.
- Managed project tasks alongside Country Manager and USN counterparts at PMA-201 to execute International Project elements through Foreign Military Sale (FMS) and Direct Commercial Sale (DCS).

Asset Manager, Cruise Missile Systems (May 2010 – September 2014)

- Ordered replenishment parts to maintain Harpoon / SLAM ER Repair Depot post production spares allowances, stock levels, and reorder points.
- Established Lean cost savings goals and tracked/reported financial status for allotted budget.
- Collaborated with Information Systems, Provisioning, Estimating, SM&P, International, Engineering, Government Property Management, and Depot personnel to support customer needs.
- Made recommendations to IT for system improvements to ensure accurate data feeds.
- Led multi-functional teams on affordability based business model improvement initiatives.

Spares Integrated Product Team (IPT) Order Demand Cell (ODC) and First Responder Cell (FRC) (July 2008 – May 2010)

- Managed Work in Progress and released spare material orders for the Defense Logistic Agencies (Philadelphia, Columbus, and Richmond) and NAVICP F18 and AV8 requirements.
- Worked with all functions within the Spares IPT to resolve issues and expedite the release of orders
- Worked in the First Responder Cell; utilized multiple systems including Integrated Material & Information Management (IMIM), Haystack, Redars, Parts Page, MS2, SLIC, DIBBS, Fed Bus Ops, and PCOST
- Represented the FRC as the IMIM enhancement focal and process focal
- Employee Involvement Team Lead for the Order Demand Cell
- Coordinated a Value Stream Mapping (VSM) event which resulted in a new paperless order process, ODC expedite group mailbox, and removed paper files/cabinets; thus utilizing CCS as the data retention system.

Contracts & Pricing Administrator, Spares IPT (August 2005 – August 2007)

- Administer Contracts for the Defense Logistic Agencies of Philadelphia, Richmond, and Columbus to provide proposals for F18 and AV8 Requests for Estimates (RE).
- Processed orders and modifications upon receipt.
- Spares Contracts & Pricing Subject Matter Expert (SME) for the Mechanized Spares Management (MS2) system.
- Liaison between DLA and other Boeing functions to resolve delivery issues.
- Processed Credit Card requests and acted as Contracts & Pricing representative in the First Responder Cell; providing proposals for commercial as well as government business.

Office Administrator, Spares IPT and Future Combat Systems (May 2001 - August 2005)

- Maintained appropriate supply levels for all office equipment and supply cabinets, updated calendars, and scheduled meetings
- Arranged travel (domestic and foreign), created expense reports, acted as a billing liaison in reconciliation of corporate accounts
- Prepared presentations and directed data flow in meetings
- Provided customer support to internal and external customers
- Implemented processes and procedures to maintain efficiency and effectiveness throughout the office
